

Limited High Performance Low Income PV Funds Available

The Clean Energy Development Fund (CEDF) has \$7,500 newly available for High Performance Low Income PV projects through the Small Scale Renewable Energy Incentive Program (SSREIP). If you have a PV project(s) on high performance low income housing that could be installed (or was installed recently without CEDF support) by December 31st, 2017, please contact Andrew Perchlik at the CEDF (contact information listed below).

The deadline to notify the CEDF of your interest in this by COB November 7th, 2017 to discuss the project and its financial needs. The Clean Energy Development Fund will select one or more projects for funding, depending upon demand. Any selected projects will be subject to the Terms and Conditions of the [Vermont Small Scale Renewable Energy Incentive Program](#) (SSREIP) and will be required to go through SSREIP processing after selection. Selection of a project does not guarantee funding.

Please contact Andrew Perchlik if you have any questions:
